

WAJID ALI

Pakpattan, Punjab, Pakistan | +92 300 0000000 | wajidali3520400@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Driven and innovative Full-Stack Software Engineer specializing in the MERN stack (MongoDB, Express.js, React, Node.js) and Agentic AI development. Proven track record of architecting, developing, and deploying scalable SaaS applications and automation tools. Founder of Wajid Tech Labs, demonstrating strong entrepreneurial acumen and technical leadership. Adept at translating complex business requirements into robust, monetizable digital solutions.

TECHNICAL SKILLS

Frontend: React.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Database: MongoDB, Mongoose, NoSQL Architecture

AI & Automation: Gemini API, Agentic AI Workflows, n8n Automation

Tools & Deployment: Git, GitHub, Vercel, Postman, VS Code, Linux (Kali)

Core Concepts: SaaS Architecture, Monetization Integration, UI/UX Principles

PROFESSIONAL EXPERIENCE

Founder & Lead Software Engineer

Wajid Tech Labs

2023 - Present

- Spearhead the end-to-end development of innovative SaaS products, managing the entire software lifecycle from conceptualization to deployment.
- Architected and developed "Agentic AI Omni-Creator," a comprehensive content generation platform utilizing React, Node.js, and advanced AI integration.
- Implemented secure user authentication and scalable credit-based monetization systems within full-stack applications.
- Designed robust NoSQL database schemas in MongoDB to ensure efficient data retrieval and optimal application performance.

IT Administrator & Educational Technologist

Morning Star Public High School

2023 - Present

- Streamline administrative operations through the development and deployment of digital solutions and automated workflows.
- Manage and digitize academic records, examination systems, and communication materials.

KEY PROJECTS

Agentic AI Omni-Creator (SaaS)

React, Node.js, Express, MongoDB, Tailwind CSS, Gemini API

- Developed a high-performance, responsive AI application that generates omnichannel content (Blog, Twitter, LinkedIn, Instagram) simultaneously.
- Engineered a custom cloud history system using MongoDB to securely store and retrieve user-generated campaigns.
- Integrated a credit management system and conditional paywalls to drive user monetization strategies.

ResumelQ - AI-Powered Profiling System

MERN Stack, REST APIs

- Built an intelligent application capable of analyzing and scoring professional resumes using AI.
- Designed a clean, intuitive frontend interface combined with a robust backend architecture for processing data.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Virtual University of Pakistan

Expected Graduation: 2027

- Currently in 7th Semester. Core coursework includes Data Structures, Algorithms, Web Development, and Database Systems.

Intensive AI Engineering Program

Google Developer Program (GEAR)

January 2026

- Completed specialized training in building scalable AI agents and integrating agentic infrastructure using Vercel.
