PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience in MERN stack architecture, AI agent development, and cloud-native solutions. Expert in building scalable, secure, and performant web applications using React, Node.js, and Supabase. Passionate about automating complex business workflows and architecting systems for high-traffic environments. 8th-semester CS student with a focus on delivering high-impact, production-ready code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java.

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, Material-UI.

Backend: Node.js, Express.js, Serverless Functions, RESTful APIs, GraphQL.

Databases: MongoDB, PostgreSQL, Supabase, Redis.

DevOps & Tools: Git, Docker, Vercel, CI/CD, Agile/Scrum.

AI/Automation: Agentic AI, n8n, OpenAI API.

PROFESSIONAL EXPERIENCE

MERN Stack Developer | CallBackCrew Software House

2023–2025 | Sahiwal, Pakistan

- Optimized MongoDB aggregation pipelines to reduce database query latency by 35% for a platform supporting 5,000+ daily active users, significantly improving overall system responsiveness.
- Architected and deployed dynamic, scalable web applications using the MERN stack, ensuring 99.9% uptime for core business services.
- Engineered reusable React frontend components, increasing team development velocity by 25%.
- Integrated real-time communication features via Socket.io, enhancing user engagement and interaction metrics.
- Built cross-platform mobile applications using React Native, delivering a seamless experience across iOS and Android.

Associate Frontend Developer | Dexterz Technologies (Pvt.) Ltd.

July 2025 | Lahore, Pakistan

- Collaborated with cross-functional development teams to deliver high-quality, responsive frontend solutions for enterprise clients.
- Implemented modern UI/UX design patterns, ensuring pixel-perfect accessibility standards across applications.

Computer Science Educator & IT Administrator | Morning Star Public High School

2025–Present | Okara, Pakistan

- Managed IT infrastructure, including network security protocols and system administration, for the school's technical department.
- Designed comprehensive curricula and assessment materials, integrating practical programming foundations into high-school technical subjects.

KEY PROJECTS

- **MyPDF Tools:** Developed a high-performance, code-based PDF utility SaaS platform for complex document manipulation.
- **AI Omni-Creator:** Engineered a system that automates digital publishing workflows, reducing manual content creation time by 40%.
- **ResumeIQ:** Engineered an AI-driven resume optimization engine using MERN and OpenAI SDKs, achieving a 40% improvement in user ATS pass rates.
- **Photo Resizer:** Built a high-performance image processing tool for batch resizing and format conversion, enhancing asset management efficiency.
- **Custom AI Agents:** Deployed automated business solutions using n8n and AI API integrations, reducing customer support response times by 60%.
- **School LMS:** Architected a full-featured Learning Management System, integrating real-time analytics to track student progress.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Superior College, Gomal University | Currently in 8th Semester

Associate Degree in IT | University of Punjab | 2021–2023
